Sandra Calvo

LOCAL Resident (Bogotá-Colombia, 2012)
International artist

Sandra Calvo, besides visual artist, has a degree in Political Science from the Autonomous Institute of Mexico and Master in Liberal Studies (Visual Arts, Urbanism and Anthropology) by The New School for Social Research in New York.

During her residence Sandra developed the project "Concrete reinterpreted", which is a record of the actions of a group of people building a future site (space). A work in shoring state. A sculptural gesture infinite steady state and unsteady. The work is spread of provisional and open architecture without architects that is not built as gated in advance. The idea is to reflect on the concepts of appropriation / expropriation, formal / informal, legal / illegal, and highlight the practical intelligence in the field of economy.

As suggested by political scientist James C. Scott, in the latter are shaped objects and spaces using some popular engineering, serving by adhoquismos problems can not be solved with the application of rigid and predetermined routines. The objects and spaces are in permanent opening between a start state and a drop or incompleteness.
